EDUCATION

Jomo Kenyatta University of Agriculture and Technology, Location, Juja, Kiambu, BSc. Computer Science 2016/08/22 - 2021/04/11

TECHNICAL SKILLS

Programming Languages: Typescript, Javascript, Java, SpringBoot, Nestjs, React, Nextjs, Python

Libraries and Tools: Azure DevOps, Git, Docker, Selenium, Postgres, MySQL, Cypress, RabbitMQ, Kafka

WORK EXPERIENCE

Senior FullStack Developer

Maternity Foundation, Remote Nov 2025- current

Key Responsibilities:

Full-Stack Development:

- Design and build user interfaces using HTML, CSS, JavaScript frameworks, preferably React.
- Develop server-side logic using languages like Python, Java, Node.js, and related frameworks.
- Manage databases (relational and NoSQL) and write efficient queries.
- Create and maintain RESTful APIs.
- Manage services and every component of the solution (existing and new). Cloud Computing Expertise:
- Architecture of cloud-native applications on chosen cloud platform (AWS, Azure, GCP).
- Utilise cloud services like compute instances, storage, databases, load balancers, and content delivery networks.
- Implement serverless functions and microservices architecture.
- Manage cloud infrastructure and deployments through CI/CD pipelines.
- Manage Microsoft Exchange and other cloud components self-managed by the organization. Quality assurance of the SDA & Cloud platform Management
- Ensure the quality and Performance of the software application.
- Code reviews.
- Test case reviews.
- Test executions and reporting.
- Manage the cloud platform.

Other responsibilities

- Mentor developers.
- Work within an agile framework.
- Have a strong understanding of software design principles and best practices.
- Experience with version control systems (Git).
- Ability to troubleshoot and debug issues across the full stack and cloud.
- Collaborate with designers, product managers, and other stakeholders
- Knowledge of security protocols and data privacy practices

FullStack Developer

DTB Group, Nairobi, Kenya, June 2023 - December 16 Built a full-featured Developer Portal from scratch to enable third-party developers to easily access and integrate with DTB's banking APIs, such as PesaLink.

* Collaborated closely with the UI/UX team to bring creative and user-friendly designs to life using modern frontend technologies.

* Led implementation of secure authentication and session management using Keycloak, ensuring robust protection for developer portal users.

* Implemented Active Directory (AD) authentication for internal DTB operations and back office staff, streamlining sign-ins and access control.

- Participated in system design and architectural discussions, contributing to scalable and maintainable software solutions.
- Built multiple high-scale applications using NestJS, leveraging event-driven architecture with RabbitMQ and Kafka to improve system decoupling and reliability.
- Introduced and mentored junior developers on modern React practices with Next.js, encouraging the use of server-side rendering for improved performance and SEO.
- Ensured the team remained aligned with industry best practices and performance optimizations across the stack. • Proactively automated end-to-end user journeys using Cypress, enabling early detection of regressions and boosting test reliability.
- **Technologies used:** Java, Spring Boot, NestJS, Vue.js, React (Next.js), RabbitMQ, Kafka, Cypress, Keycloak, Active Directory

Billing Engineer

Safaricom, Nairobi, Kenya, Nov 2021 - June 2023 • Redesigned the invoice layout for Safaricom's PostPay customers, enhancing clarity and brand consistency across billing communications.

- Improved the overall customer experience for enterprise clients by optimizing various cloud-based products offered by Safaricom.
- Collaborated closely with the call center team to resolve product-related issues, contributing to faster turnaround times and improved customer satisfaction.
- Successfully deployed up to 12 new products to production, expanding Safaricom's digital service offerings and market reach.
- Gained in-depth expertise in Huawei's CBS (Charging and Billing System), providing critical support to integration developers and ensuring smooth service delivery.

Full-stack Engineer

Gratitude India, Remote Aug 2019 - Nov 2021 • Developed a full-stack recruitment platform using Laravel, delivering a robust and user-friendly experience for both recruiters and job seekers.

- Integrated Sendbird to implement a seamless real-time chat system, enhancing communication across the platform.
- Designed and documented best practices while mentoring junior developers to ensure code quality and consistent development standards.
- Built and optimized scalable, RESTful APIs using Laravel to support high-traffic application requirements. • Led the setup and deployment of Mattermost for internal team communication, further enhancing collaboration beyond the in-app chat solution.

PROJECTS

- **Myglit**, MyGlit.com is a global recruitment platform designed to connect job seekers, recruiters, and employers, with a particular focus on the BPO (Business Process Outsourcing) industry. Powered by Gratitude India, a recruitment agency with nearly two decades of experience, MyGlit aims to streamline the hiring process through technology and innovation. [Myglit](#)
- **Masoko**, Masoko.com is Safaricom's official e-commerce platform, originally launched in 2017 to connect Kenyan consumers with a wide range of products from local merchants. While it initially operated as a broad online marketplace, Masoko has since evolved into a curated digital storefront focusing on premium electronics and mobile devices. [Try it!](#)
- **Astra Developer Portal**, Astra Africa is a fintech platform developed by DTBX, the Digital Factory of Diamond Trust Bank (DTB), designed to provide comprehensive financial services through a suite of APIs. Astra enables businesses to integrate banking functionalities into their digital products, facilitating seamless financial transactions and operations. [Astra](#)
- **InfinitiLite**, InfinitiLite is a merchant management and payment gateway platform developed by Infiniti Africa. It is designed to help businesses in Kenya and across Africa streamline their payment processes and gain insights into their financial performance. [Try it!](#)

Safe Delivery App is an app used by midwives and frontline health workers to learn and assist pregnant women.
